titan instruments

nopa<sup>®</sup> instruments

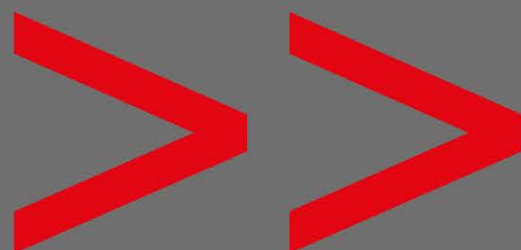

**Besonderheit:**

**nopa** Titan Instrumente bieten insbesondere in der Herz-Thorax-Chirurgie Vorteile gegenüber herkömmlichen Instrumenten. Titan ist ca. 45% leichter als rostfreier Edelstahl, weshalb Titan Instrumente weniger traumatisierend sind. Titan ist außerdem ein vollkommen korrosionsbeständiges und antimagnetisches Material. **nopa** Titan Instrumente bedeuten größtmöglichen Komfort für den Chirurgen.

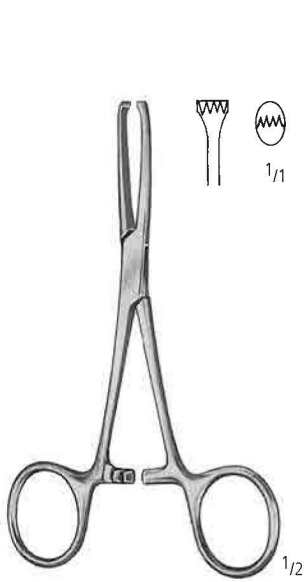

**Features:**

**nopa** Titan Instruments provide especially in Cardiovascular surgery a significant advantage compared to other Instruments. Titan is approximately 45% lighter than stainless steel. For that reason, Titan Instruments are less traumatic. Besides that, Titan is a completely stainless and anti-magnetic material. **nopa** Titan Instruments are the most comfortable choice for the Cardiovascular surgeon.

**JULES PEAN**, born 1830, died 1898, was the most important French gynecological surgeon of his time. He studied at Paris 1860. 1864 Pean was the first surgeon in Paris to perform an ovariectomy. By the use of Pean pins he introduced forceps pressure for control of hemorrhage, thus he invented the most used surgical instrument, next to the scalpel.

**ALBERT J. OCHSNER**, born 1858, died 1925. He devoted much time to attending and participating in medical discussions and was member of all leading societies in his fields.

- >> Alle unsere Mikroscheren werden von Fachkräften mit jahrelanger Erfahrung hergestellt. Die Endkontrolle findet unter dem Mikroskop statt. Um Ihnen ein ermüdungsfreies Arbeiten zu ermöglichen, wird dem Federdruck größte Aufmerksamkeit gewidmet.
- >> Bitte wählen Sie unter Rund- oder Flachgriffscheren.

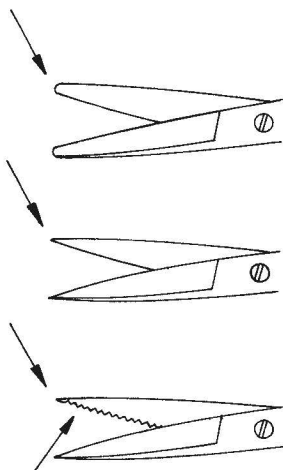

**Dissection:** **Gebogene Blätter, abgerundete Spitzen** ermöglichen eine gute und sichere Dissektion, ohne Nerven und Blutgefäße zu beschädigen.

**Adventitia:** **Gerade Blätter, sehr scharfe Spitzen** gewährleisten präzises Anfrischen von Gefäßenden.

**Nerve:** Ein Blatt ist **fein gezahnt**, um ein Herausgleiten des Nervs zu vermeiden.

- >> All our Micro Scissors are manufactured by skilled craftsmen with many years of experience. Final inspection is carried out under a microscope. Careful attention is paid to the closing pressure of the spring handle, to ensure precise work during surgeries, without fatigue.
- >> Round or flat handle scissors according to your preference.

**Dissection:** **Curved blades, slightly rounded tips** ensure safe dissection without damage to nerves and vessels.

**Adventitia:** **Straight blades, very sharp tips** for finest trimming of vessel ends.

**Nerve:** One blade is **fine-toothed** to avoid slipping of the nerve.

**nopa-econom** Elektroden sind durch LUER-LOCK Kupplung leicht auseinandernehmbar. Trotz Verwendung von hochwertigstem Isoliermaterial werden Elektrodenschäfte immer wieder durch unsachgemäße Handhabung oder Reinigung beschädigt. Das nopa System garantiert schnelles und enorm kostengünstiges Auswechseln. Durch unsere Kombinationsmöglichkeiten ergeben sich bereits bei der Grundausstattung erhebliche wirtschaftliche Vorteile.

**nopa-econom** electrodes are easy to take apart by means of a LUER-LOCK coupling (connection). Although our electrode shafts are coated with superb insulation material, the insulation is very often damaged due to improper handling or cleaning procedures. The nopa system guarantees a fast, reliable and inexpensive exchange of shafts. The combination possibilities offer enormous cost advantages even for a basic instrument set.

### Beschreibung XT 305/00 / XT 305/01

Das nopa cam camera system future 500 ist ein hochentwickeltes 3-Chip Kamerasystem und für alle endoskopischen Eingriffe einsetzbar.

Ausgezeichnete Bildqualität, scharfe Bildzeichnung und Klarheit werden durch die drei 1/3" CCD-Chips gewährleistet.

Die optimale Bilddarstellung aufgrund eines hochempfindlichen Mikro-Linsen-Chip sowie einer äußerst schnellen Blende wird auch unter schwierigsten Beleuchtungsbedingungen sichergestellt. Der leichte, kompakte Kamerakopf ist äußerst ergonomisch und einlegbar. Alle Adapter und Coupler mit einem C-Mount-Gewinde können angeschlossen werden. Der automatische Weißabgleich wird durch Schalldruck aktiviert und ist im Memory gespeichert.

Zusätzlich bietet das System eine "window"-Funktion um unter extremen Lichtverhältnissen eine gute Bilddarstellung zu garantieren. Größe und Einstellung dieses Spezial-Focus werden über den Druckschalter aktiviert und auf dem Monitor angezeigt.

Aufgrund des hohen Automatisierungsstandards der nopa cam future 500 ist das Kamerasystem sehr bedienerfreundlich. Kamerakopf und Kabel sind einlegbar.

### Description XT 305/00 / XT 305/01

The nopa cam camera system future 500 is a highly developed three chip camera system which can be used for all operations performed with endoscopes. Excellent picture quality, sharp picture delineation and clarity are guaranteed by the three 1/3" CCD chips.

Optimal picture presentation is ensured by a highly sensitive micro-lens chip with an extremely rapid diaphragm even under difficult lighting conditions. The light, compact camera head is ergonomic and immersible. All adapters and couplings with a C-mount thread can be connected. The automatic white compensation is activated by press button and is stored in the memory.

The system additionally offers a "window" function to ensure a good picture representation under extreme lighting conditions. The magnitude and setting of this special focus are activated by press button and displayed on the monitor screen.

The nopa cam future 500's high standard of automatic operation makes this camera system extremely easy to operate. The camera head and cable can be immersed.
